

DO'S

DON'TS

Do: USE me, STERILISE me, RESET me

RESET TIME for RapidCool™ is 3 hours, if using UV or cold water sterilisation no additional reset time is required within the 3 hours.

Heat reactivates the RapidCool™, please allow the following reset times after the RapidCool™ has been exposed to the following

Dishwashing
SUITABLE FOR FLASK
BASE ONLY

**Steam
sterilisation**
SUITABLE FOR FLASK
BASE ONLY

Don't forget to check the instruction leaflet to see which product parts are suitable for sterilisation

Do: Tilt the RapidCool™ when checking the temperature so that the feed inside is touching the lid, this helps to give an accurate temperature reading

Don't: Dispense the feed before 2 minutes*

*Time varies between 2-5 minutes depending on the size of the feed.

Don't: Store a made up feed in the RapidCool™. No baby wants their milk to turn into cheese!...

Don't: Panic if you hear a crackling sound when making your feed. This is the RapidCool™ magic in action.
